MEET YOUR EXECUTIVES

Omotiafe D. Aregbeyen (OSHAFI)
PRESIDENT

Sonia Oyinkansola Kajotoni
VICE PRESIDENT

Gboyega Oluwafemi
HARDWARE DIRECTOR

Oyedele Anjolaoluwa Winnie
ASST. HARDWARE DIRECTOR

Michael Awoyinka (MICHETHEGREAT)
SOCIAL DIRECTOR MALE

Ajibola Sophia
GENERAL SECRETARY

Aguocha Obed
ASST. GENERAL SECRETARY

Michael Ajetunmobi (STUDIT)
PUBLIC RELATIONS OFFICER

Ogundiran Boluwatife
WELFARE DIRECTOR

Olukowade Oyindamola
ASST. WELFARE DIRECTOR

Hammed Azeezah
SOCIAL DIRECTOR FEMALE

Ngwoke Elvis
ACADEMIC DIRECTOR

Tega Abiri
ASST. ACADEMIC DIRECTOR

Airmanoshi Elagauma
FINANCIAL SECRETARY

Adesanmi Oluwanifemi
SPORTS DIRECTOR MALE

Oluyomi Moronfoluwa
SPORTS DIRECTOR FEMALE

Ogoji Adejoke
COMPUTER SCIENCE COMMISSIONER

Taiwo Ifeoluwase
SOFTWARE DIRECTOR

Adeleye Daniel
ASST. SOFTWARE DIRECTOR

Marvelous Otis
CHIEF WHIP

Amosun Ifawuyil
CYBER SECURITY COMMISSIONER

Nicole Akhabhoa
SOFTWARE ENGINEERING COMMISSIONER

WEB3: THE NEW META

MEMBER CONTRIBUTION

Noah Biliamin
Web3 Enthusiastic
Computer Science 400 Level

Web3, often hailed as the third generation of the internet, is built on blockchain technology and puts control in the hands of users. It aims to eliminate the need for intermediaries or third parties, offering unprecedented direct ownership over digital identities and assets.

Why is Web3 Gaining Attention?

Web3 is attracting interest for several reasons:

1. It addresses the problem of third-party control over user data.
2. It promises to give users more control over their online presence.
3. Many see it as a potential avenue for significant opportunities in the digital age.

Brief History of Web Evolution

The internet has evolved through three main stages:

1. Web1: Read-only internet. Users could access information but couldn't interact with it.
2. Web2: Read-write internet. Users could create content (e.g., social media), but often couldn't truly benefit from or own what they produced.
3. Web3: Read-write-own internet. Users can read, create, and own their digital assets and data.

Key Components of Web3

Blockchain Technology

A distributed, decentralized ledger system that records transactions across multiple computers, ensuring permanence, transparency, and tamper-resistance.

Decentralized Finance (DeFi)

A type of financial system that eliminates third-party intermediaries, giving users full control over their assets.

Smart Contracts

Self-executing code deployed on the blockchain that automatically executes when predefined conditions are met.

Advantages of Web3

1. Ownership: Total control over digital assets.
2. Censorship Resistance: Information is not easily controlled or limited.
3. Identity: Provides user anonymity and control over personal data.

Challenges Facing Web3

1. Scalability: Many Web3 networks struggle to process large numbers of transactions quickly and cheaply, limiting widespread adoption.
2. User Experience: Web3 technologies are often complex and unintuitive for average users, creating a significant barrier to entry.
3. Regulatory Uncertainty: Lack of clear regulations in many countries creates risks for projects and users, potentially hindering innovation and adoption.

As Web3 continues to evolve, addressing these challenges will be crucial for its widespread adoption and success

DAVID OLUWAJOJU ADEMUYIWA

THE POWER OF BALANCE: JOJU'S FORMULA FOR ACADEMIC AND LEADERSHIP SUCCESS

I'm David Oluwajoju Ademuyiwa, a Master's student in Artificial Intelligence at Loughborough University, UK. I graduated from Bowen University with a degree in Computer Science, where I had the honour of serving as the BBSF President during the 2022/2023 academic year and finishing as the top student in my department.

1. What sparked your interest in Computer Science?

My fascination with technology began in childhood, inspired by science and tech shows. When choosing my university path, I sought a field that allowed creative exploration, and Computer Science was the perfect choice.

2. How did you maintain excellent grades while leading BBSF?

Achieving high grades was a journey that started from my first day at university. By the time I became president, I had already laid a strong academic foundation. Balancing responsibilities required effective time management and a focus on priorities, supported by my earlier dedication to my studies.

3. What challenges did you face as a student leader?

As president, I faced increased responsibilities, including planning events and attending meetings, often conflicting with classes. I learned to delegate tasks to my team and received support from classmates, which helped me manage my academic and leadership duties effectively.

SPOTLIGHT FEATURE

4. Which accomplishment as student body president are you most proud of?

I take pride in reintroducing souvenirs for freshmen—something that hadn't been done in years. Additionally, I'm proud of our initiative to build recreational table tennis facilities, enhancing the student experience.

5. Did your leadership role change your academic approach?

Not significantly. While it required some adjustments, my commitment to academics remained steadfast, despite the added responsibilities.

6. What's your secret to balancing academics with leadership?

I believe true balance isn't about equal time for everything but about prioritizing what matters most at different times. Sometimes I focused on leadership tasks; at other times, my studies took precedence. It's about knowing when to prioritize.

7. Tips for students excelling in academics and leadership?

Identify what's important and learn to delegate. Build a supportive network of classmates, mentors, and lecturers. Believe in your potential to excel in both areas and work hard toward your goals.

8. How has your university experience shaped your career?

My university journey has been pivotal, thanks to the connections I made. The support from peers and mentors helped guide my career in technology, from internships to project involvement, which I attribute to a higher power orchestrating these relationships.

9. One piece of advice for students?

You have the power to change the status quo. Don't just accept what others say, like "This course is hard" or "People fail a lot." Instead, dare to try it for yourself, with success as your goal; because those reports are often personal experiences, not an objective reality.

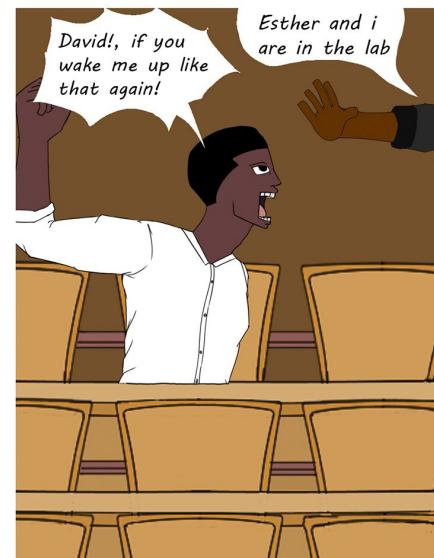

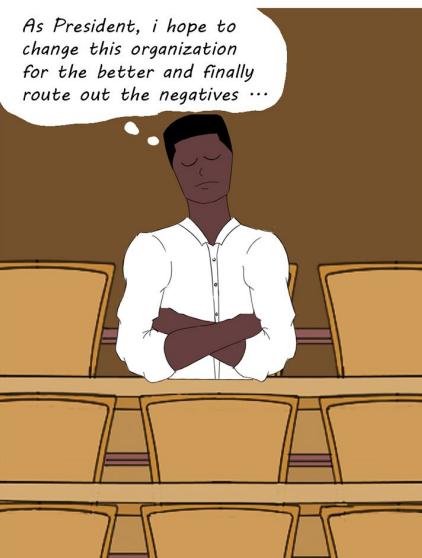

Take up challenges, figure out what works best for you, and stay focused.

Ultimately, you're responsible for shaping your future, so take charge of it.

BOARD OF KINGS

It was the 1st time in NACOS History. But according to History only one leads.

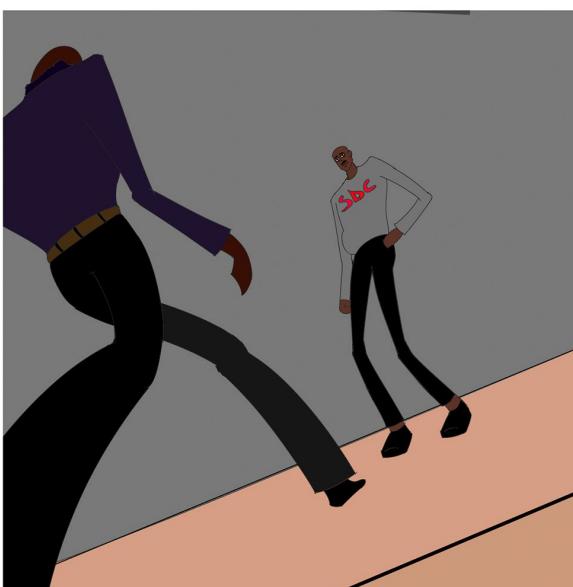

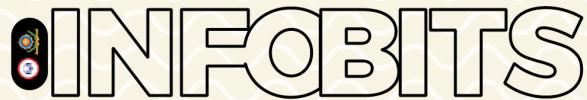

MUST-HAVE ITEMS FOR A SMOOTH RETURN TO CAMPUS

- 1) Essential Documents (Admission letter, school ID, passport photos, and any required medical documents.)
 - 2) Stationery & Devices (Notebooks, pens, calculators, laptop/tablet, chargers, and external storage.)
 - 3) Room Essentials (Bedding (sheets, pillow, blanket), toiletries, cleaning supplies, and laundry bag.)
 - 4) Personal Items (Comfortable clothing, formal wears, shoes, and personal care items.)
 - 5) Snacks & Drinks (Non-perishable snacks,i.e Biscuits bottled water, and some quick on-the-go snacks.)
 - 6) Personal Development Materials (Motivational books, hobby supplies, or any resources to keep you productive outside academics.)
 - 7) Power bank, padlocks, umbrella/raincoat, sunscreen and any personal favorite items that make you feel at home.
 - 8) Plenty MONEY
- | Hangout Spots on Campus | Best WIFI Connection Locations |
|-------------------------|--------------------------------|
| 1) Sport Complex | 1) Library |
| 2) Cristoy | 2) COCCS Building |
| 3) SMS | 3) SMS Building |
| 4) BBSF | 4) LAS |
| 5) Agric Field | |
| 6) Chapel Environs | |
| 7) Your Hostel | |

RESUMPTION DATE
Freshers : 30th September, 2024
Returning Students:- 7th October, 2024
